Abstract. To support the development of village potential and improve public services in village government, good governance can be done and implementing programs that can support the performance of village officials in serving the community. A building is needed which is the Office of the Head of the Village Government to accommodate all these activities, where the function of serving the community requires minimum infrastructure facilities to be available. The village office as a symbol of government in the village should be built as well and beautifully as possible with good design and sufficient funds to support all the existing potential of the village. Munggu Village, as one of the villages located in Badung Regency, Bali Province, certainly really needs village government office facilities that can support the development of tourist villages. It is hoped that the village government office building facilities will serve as the village government center and also a public service mall. The methods used in this service are survey, interview and focus group discussion (FGD) methods. The results of the PKM team will be used as planning documents for submitting proposals for funding applications to the government or other institutions.

Keywords: Munggu village's office; government center; public service mall

1. Introduction

Munggu Village is a village located in Badung Regency, Bali Province. Through Badung Regent Regulation No. 47 of 2010, Munggu Village was designated as one of eleven tourist village areas in Badung Regency (Perbub, 2010). Geographically, Munggu Village is very strategicallylocated and very easy to reach from major tourist destinations such as the Tanah Lot tourist destination, Denpasar City, Kuta, and Ngurah Rai International Airport. Munggu Village has various potentials both regarding natural potential, cultural potential and human resource potential that are worthy of being developed as a tourist destination in Badung Regency. (Kartimin, Mekarini and Arini, 2022).

To support the development of village potential and improve public services in village government, good governance can be done and implementing programs that can support the performance of village officials in serving the community (Ali and Saputra, 2020). To accommodate all these activities, of course a building is needed which is the Office of the Head of the Village Government. The spatial layout of the Head of Government Office at the village level is based on the village organizational structure in general, where the function of serving the community requires minimum infrastructure facilities to be available. The village office as a symbol of government in the

village should be built as well and beautifully as possible with good design and sufficient funds (Dan and Perdesaan, 2016).

This Community Partnership Program will accommodate the needs of Munggu Village to create a village government office that can improve village government governance, improve service functions to the community so that it can improve the economy, tourism, culture, religion and the environment. Through discussions with the Munggu Village Office as a partner representative, it was agreed that this partnership program would produce a Masterplan for the Munggu Village Office. The Munggu Village Office will occupy 32 acres of land, about 1 km from the old perbekel office.

2. Problems

Based on the situation analysis described above, the problems faced by partners can be identified, namely: There is no master plan document for the Munggu Village office that supports the realization of an environmentally friendly tourist village.

3. Discussion

1. Initial Observations and Surveys

Interview with partners of the community service team (PKM Team), in the initial stage, they visited the office of the Munggu Village Perbekel, Mengwi District, Badung Regency and met with the Munggu Village Perbekel on January 19 2023. Interview with the Munggu Village Perbekel, namely Mr. Ketut Darta regarding the problems that exist in Munggu Village and the potential of Munggu Village.

Identify problems faced by partners. We identify partner problems with the Munggu Village on January 21 2023. Where the village officials are Munggu Village Headquarters, Village Secretary and Munggu Village BPD. Then identify partner problems, we will discuss them further with the service team on January 29 2023

Signing of the partner cooperation statement letter. The signing of the partner cooperation statement was carried out on February 4 2023

2. Observation and Data Collection Continued

3. Focus Grup Discussion (FGD)

4. Proposed Arrangement in the Form of Design and planning space requirements

5. Focus Group Discussion (FGD)

After the Layout Plan drawing stage, it was then presented and consulted in the form of a Focus Group Discussion (FGD) with partners, namely the Munggu Village Apparatus. This stage also gives partners the opportunity to re-ensure that what is needed has been fulfilled. If it is not fulfilled or is still incomplete and so on, then the revision stage will be carried out, both major revisions and minor revisions, by PKM team.
